

PUNCTUATION

PACHYCEPHALO

TYPUS

I am Punctuation Pachycephalosaurus  
I was recruited to teach you  
about punctuation

People think they  
Smarter than  
because they  
Others do not know about  
punctuation

I am here to tell you that what  
they think matters does not and  
I will prove it with my skull

are  
others  
the

● The first punctuation mark we will learn about is the period. It terminates a sentence but there are many things that terminate a sentence for instance earthquakes and violence and the end of a transmission of a datum. If you use a period when it is not needed it makes you seem like you have some agenda involving the other person being beneath you

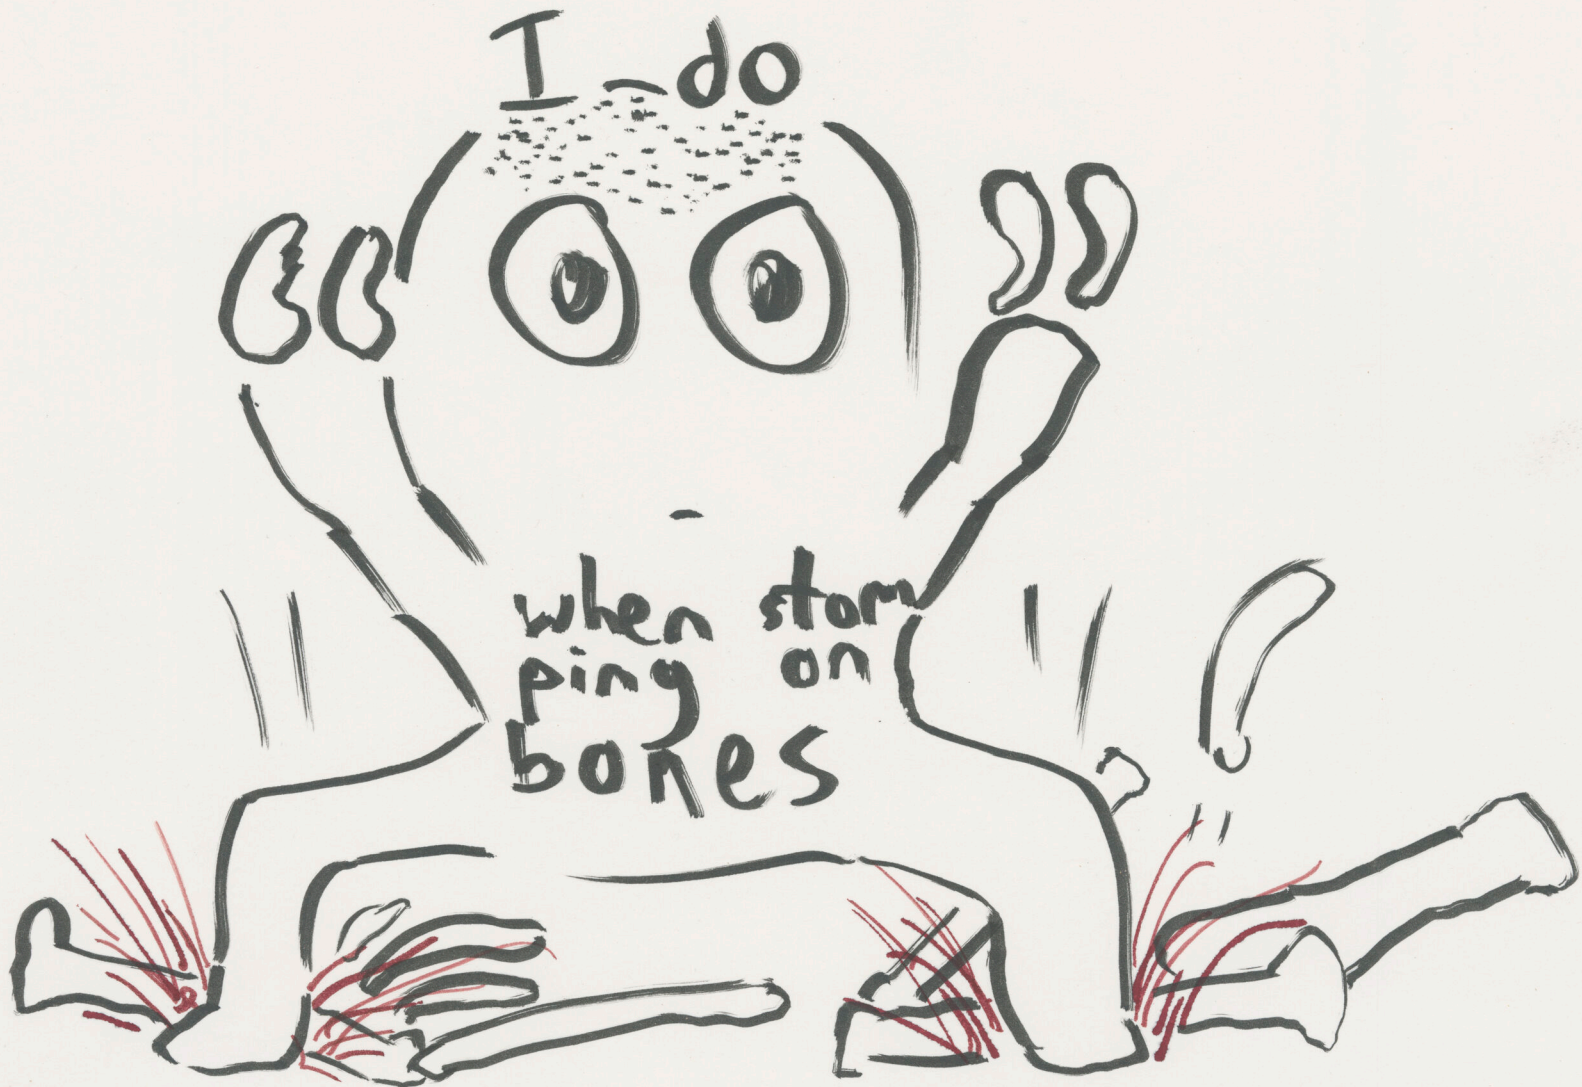

I have no qualms, quandries  
(quandaries?) or queries about  
the ? but I must ask  
that you turn your head  
sideways when using it

quanderies?

Commas people like to put  
commas betwixt adjectives but  
if the order sounds wrong when  
you say it they are not coordinat  
e adjectives, for instance, a  
delicious, grilled cheese sand-  
wich, but a grilled, delicious  
cheese sandwich, it is you who  
should be eaten

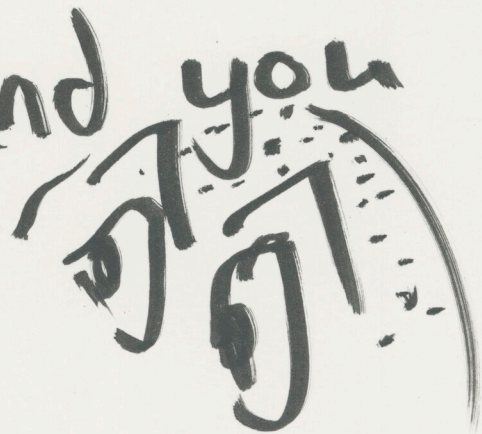

↪ in a different  
order

9 9 9 9 9

Unlike the question point  
the explanation point is assert-  
ive! I do wish there could  
be a half explanation point  
as the full one is a bit much  
! I hate it and you  
must agree!!!

I quite like the semicolon  
; there is no better ; legal  
way to upset the cognisce-  
nti ; a ; k ; a ; those who are so  
well-educated you can smell  
their putrid stench even  
with them so far above  
in their towers filled with  
stinky books ;

Punctuation  
+ transcends  
words as  
with the

~~Hyphens~~ Hyphens tell us  
that we as vertebrates are  
constantly changing our  
written representation of spe-  
ech ~~case~~ case in point 65  
million <sup>em dash</sup> years ago less <sup>en dash</sup> some  
small fraction thereof ↓ today  
was spelled to-day ~~I-~~ I-  
ntriguing wouldn't-you-say

I hope to impress (upon!)  
you that it is a sign of  
supreme unintelligence  
to disparage what one  
believes to be other's  
lack of understanding  
about something so arbitrary,  
precariously "correct" and meanin-  
gless as punctufuckinguation..

asterisk???

Cute!

have 3 dots

---

\*I recognize the irony of my telling you  
all of this (& so condescendingly!).

And though I cannot name any experts in this field of study, science supports my argument as will, ultimately, the fossil record.
